

Import your future stock birds from Hans Eijerkamp and Sons

We are honoured that Mr. Greg Hamilton and John Hofman have decided to make a special importation from Europe in 2010 with pigeons exclusive from Hans Eijerkamp and Sons as well as Ponderosa UK Stud.

It was John Hofman who already joined the Eijerkamp team as 1991 the Ponderosa Australia was opened with John as manager of this great loft in Australia. We, Hans Eijerkamp and Sons, have supplied John with the best pigeons we could supply him in order to give an extra boost to the Australian pigeons. This succeeded with no doubt as many fanciers in Australia and New Zealand bought their future stock birds at John's place. In all these years a special relation was established between him and the Eijerkamp family. He visited Holland and England often to see with his own eyes the quality of pigeon in the Eijerkamp lofts in Holland as well as in Ponderosa in Weymouth. In 2005 John Hofman was forced to stop the Ponderosa Australia due to health problems and with that we lost a great contact to the many Australian customers who dealt through John Hofman. In those years the policy of the Eijerkamp family also went into another direction as we closed all our other breeding stations in China, Northern America and England. In England Tony Haynes and Mary Hounsell took over the breeding stud and continued under the name of Ponderosa UK Stud in which Hans Eijerkamp and Sons have not any participation at all anymore. The deal was made in good friendship and a lot of the pigeons remained in Weymouth. Fanciers all over the world always asked if we also participate in races in those countries which was not possible for us to do. At the Greenfield Stud in Brummen we have won nearly everything with our pigeons what could be won. For more than 45 years the name Eijerkamp is settled and up to 2009 year by year top results were achieved at the Eijerkamp lofts. National Victories, Olympia pigeons, National Championships and uncountable first prizes and championships won at federation, combine, amalgamation, provincial and National level were won. We have invested lots of time, effort, money, sweat and tears to achieve everything what we have succeeded in. In this way we select all birds that were in our lofts over the years. We are one of the very few breeding studs that challenge the competition but this is just because pigeons are the hobby for Hans and Evert-Jan Eijerkamp. Surrounded by a team of specialists Team Eijerkamp became one of the best lofts in the world. Next to this we also want to share this with other fanciers and so we are honoured to select top material to make also other fanciers champion with descendants of our pigeons.

Over the years many Australian fanciers paid a visit to our lofts at the Greenfield Stud and in 2007 Mr. Greg Hamilton made himself known at the Greenfield Stud in Brummen. He had a fine weekend here and enjoyed himself to see the great quality of our racing and breeding birds. In the years before it was also noticed that the Eijerkamp pigeons did have a great influence on the Australian pigeons and therefore he also decided to make for 2010 a Special importation from the great Eijerkamp source in Holland.

With this the fanciers Down Under have now the possibility to buy direct from the golden lines that established the Eijerkamp name in Australia like the Eijerkamp – Janssen, Van Loon, Heremans - Ceusters, the Eijerkamp - Long distance families, Vandenabeele etc.

As the import for this consignment is scheduled for June 2010 Hans Eijerkamp and Sons will give Australian fanciers the possibility to obtain superb pigeons from all possible families and top pigeons. For this opportunity they bred in August – September 2009 already some exceptional birds for the possibility to buy early 2010 pigeons. As all pigeons in the Eijerkamp lofts always vaccinated for the Paramyxo these 2009 youngsters were not especially for the possible buyers. In 2010 Hans Eijerkamp and Sons give special opportunity to buyers, who order in time, to buy 2010 bred birds. To do this we will hatch our own young bird's one round later to have the birds old enough to be shipped especially for the Australian fanciers.

We also give the possibility to acquire direct youngsters, limited available, from champions as

- Ché, Number 1 breeder in the moment and winner him self of 1st National NPO Orleans 2006
